

2018 Summer Programs

Mountain Lake Biological Station

Courses

Rolling enrollment for classes now open! Financial aid deadline March 15

MLBS courses are field-intensive, research-based experiences. Courses earn 3 UVA Biology credits. Non-college students are welcome to enroll. Financial assistance is available.

Field Biology of Fishes Summer Session I (May 21-June 15)

Field Herpetology Summer Session I (May 28-June 15)

Wildlife Disease Ecology Summer Session II (June 18-July 6)

Stream Ecology Summer Session III (July 16-August 3)

Research Experiences for Undergraduates (REU)

May 28-August 3

Application deadline February 20

Become a National Science Foundation REU. Join undergraduates from around the country for a unique 10-week learning and living research experience in the southern Appalachians. Students conduct independent research in field ecology, evolution, behavior, and physiology under the supervision of Station scientists. REUs are internships that include all Station costs, travel, and a \$5,500 stipend.

Grant Writing Workshop

July 29-August 3

Registration deadline July 14,
limited financial aid available

Join us for six days of hands-on grant writing instruction led by former PI and current NSF program officer, Leslie Rissler. Geared towards early career faculty, postdocs, and senior graduate students.

Mountain Lake Biological Station is a residential field station located in Giles County, VA, within the eastern deciduous forest of the Appalachian Mountains. MLBS is committed to serving researchers, instructors, and students who learn, live, eat, and play together and wish to take advantage of our rich ecological and biological diversity, full on-site scientific support, and inspiring academic community.
