Mr. Imagination

EVIL INCARNATE

Speedo Man Saves the day

She camps
guy.

DID YOU JUST SAY THAT?

Behind every
joke, there's
a little bit
of truth.

THONG WOMAN

ALL I NEED IS
BEER AND TWO
INCHES.

JUST KIDDING,
NO SERIOUSLY.

If you want to see mating

This snake will not
eat this salamander!

HILTON HEAD OR
BUST!

AND THEN YOU WOKE UP!

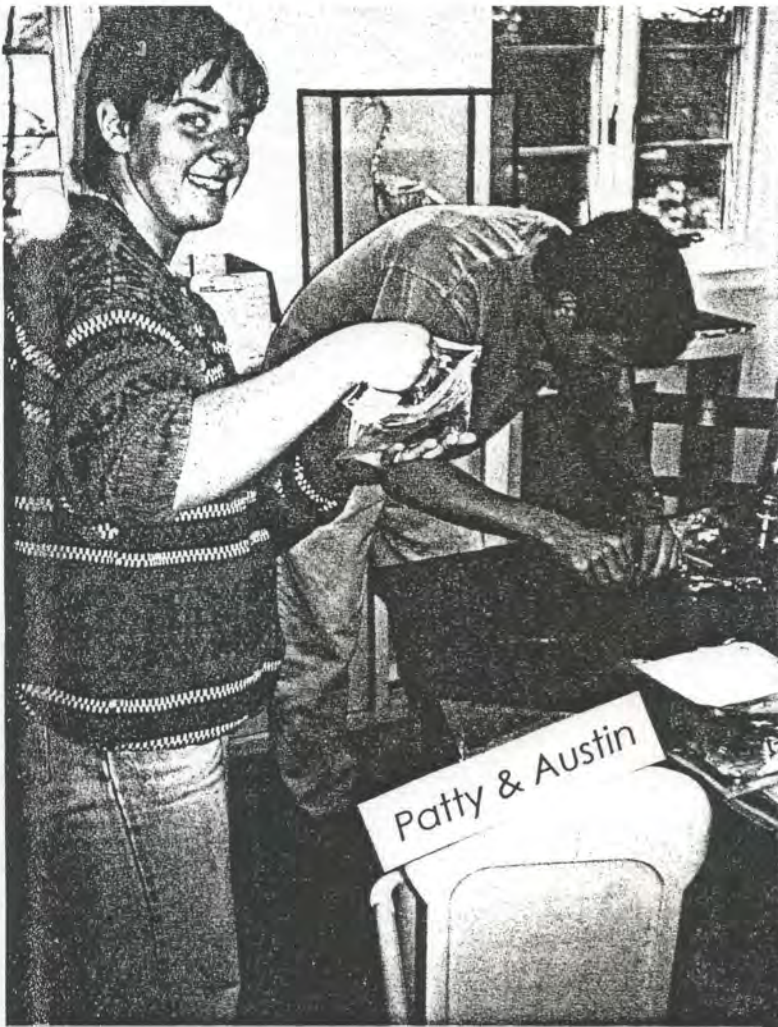

THEY'RE
SO
CUTE

THE PRICE IS WRONG,*@!##!

We love Sharon's
lectures.

THE 5th ANNUAL MLBS PLAY

HAROUN

AND THE SEA OF STORIES

Zembla Zenda, Xaradu:
All our dream-worlds may come true.
Fairy lands are fescorne too.
As I wander far from view
Read, and bring me home to you.

BY SALMAN RUSHDIE

ADAPTED FOR THE MLBS STAGE

BY BECKY WILBUR

ODE TO CONSERVATION BIOLOGY 1997

Time to say goodbye
To the summer of '97,
Trade in peeping frogs
For malls and Seven-Elevens.

Cons Bio was a blast
Even if we never slept;
When it all was over,
We really could have wept.

Allison brought social grace,
Matthew was ALWAYS right,
Chris went off and danced with wolves,
Grace rowed late at night.

Michelle came seeking culture,
E.O. sought a new view,
Gwen was bored with vacation,
And wanted work to do.

"Escape from natural enemies",
Monitoring extinction,
The value of biodiversity,
Effects of fragmentation,

Concepts that we wrestled with,
Resisting false simplicity,
Sometimes caused an argument
But never animosity.

That field trip to the Outer Banks
Provided lots of sun,
But it was in the powercut
That we really had the fun.

So now PK and IMP
Turn the page and say adieu;
What will do for aggravation,
Now that we've lost you?

YOU'RE NOT IN SUMMER CAMP ANYMORE: FAMOUS LAST WORDS IN CONSERVATION BIOLOGY

1. "This 6-pack should last me the week."
2. "Desperate times call for desperate measures."
3. "The deer ate my data."
4. "No one will find out if we... [fill in blank with *anything*]."
5. "Ingrid and Peter just want to make things easier for us."
6. "Well, at least this is our last trip down the powercut."
7. "They'll never know we stayed up working on this until 5 a.m."
8. "What is there to do on the eve of St. John's Day?"
9. "This lab looks easier than the last one."
10. "I'm going to run/hike/swim every day."
11. "Sure, we can print this without saving it first."
12. "You weren't wearing your bad idea jeans, were you?"
13. "I'm gonna have a few beers and then clean the Lewis Lab."
14. "I bet Peter was up late last night preparing those overheads."
15. "Wait a minute...this doesn't look like Hieraceum."
16. "You can sleep in the van."
17. "At least we're not making a spectacle of ourselves."

MLBS

(Mountain Lake Ballroom Society)

presents

DIRTY DANCING

BALLROOM DANCING FOR
QUEER BIOLOGISTS

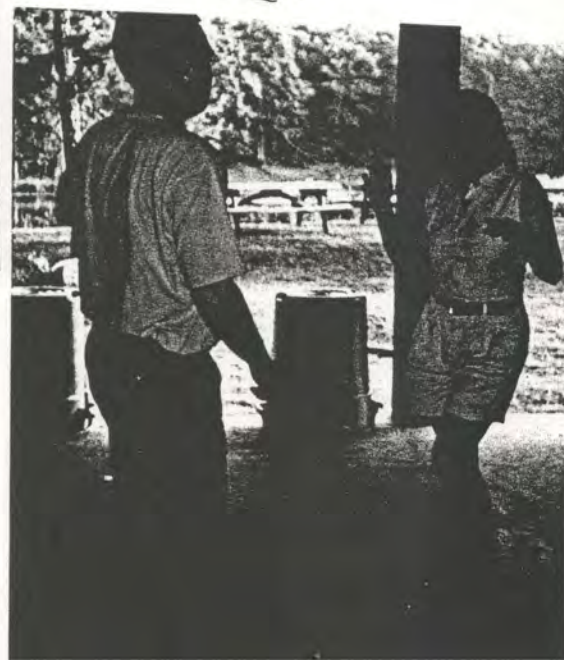

An informal series of ballroom dance lessons to be held on
Sundays after the cook-out, in the pavilion.

Starting Sunday June 15th.

For more information, see Tom Smulders.

Dance!

MOLECULAR TECHNIQUES

Front: John Walker, Doug Taylor, Patty Hunley,
Rytas Vilgilys
Back: Anna Leung, Trip Rems, Cathie Aimee

Hard at work!

1997 REU Research Projects

- Ben Koch:** How certain ecological characteristics of *Castanea dentata* interact with the infectious strategy of *Cryphonectria parasitica*
- Steve Trimble:** Colonization ability in the gynodioecious Bladder Campion (*Silene vulgaris*): sexual inequality?
- Amanda Helin:** Inflorescence preformation and reproductive allocation in *Amianthium muscaetoxicum*
- Jennifer Maupin:** Intraspecific density effects on female reproductive strategy in *Plethodon cinereus*
- Sarah Smith:** Suprachiasmatic nuclei lesions in wild-caught, free-living chipmunks (*Tamias striatus*): Effects of mortality, territoriality shifts, and burrow activity
- Jennifer Krstolic:** On variance levels in flowering morphology: The role of symmetry and pollinator preference
- Wendy Palen:** The Distribution and Behavioral Ecology of the Crayfish Species in Two River Drainages
- Rebecca Chalmers:** A comparative study of *Desmognathus* assemblages across the Eastern Continental Divide
- Jennifer Lau:** Factors affecting the pollen removal of *Campanula americana*
- Jennifer Lewis:** Morphological variation in a *Monarda* hybrid population across a habitat boundary on an abandoned golf course
- Chris Bailey:** An examination of survival rates and life-long reproductive success of chipmunks deprived of their neural biological timing systems
