27 September 1996

Dear Mountain Laker,

I trust that all of you are settled into a new academic year. About twenty of us are gathering tonight for our annual fall work weekend at MLBS to cut firewood, clear trails, put up posts for new trail signs, put together the Echoes, and generally get the place ready for winter. The leaves have already begun to change color, but we have not had our first frost yet. Pryia is still in residence trying to finish her REU project but otherwise the station goes from crowded on weekends to quiet during the weeks.

Plans for next summer are still tentative. I am counting on Peter Karieva to return for Conservation Biology with a new guest star during first session and the Anne & Alastair show to return to Behavioural Ecology second session. I think we can count on Doug Taylor and Rytas Vilgalys to repeat the DNA traveling road show second session. I am working on two new courses, one about plants, the other about insects. Final plans and details will be sent with the 1997 brochure this winter.

I wish to thank you for an exceptional summer in 1996. I thought the REU program was spectacular and all classes highly successful. It was especially wonderful to see how everyone helped get Eric Nagy off to a great start as Associate Director, especially when I left him holding the bag with Brenda Christensen when I returned to Charlottesville for surgery. Thanks just as much to all for being so great the rest of the summer as well. I hope that you look back on the summer as both a great educational experience and a lot of fun in class, in the field, at the races, on the river, in the woods, in the dining hall, and around the station.

Best of wishes for the last three months of the Year of *Kalmia* and for the beginning of the Year of *Anax*. I hope to see many of you again next summer. Tell your friends about us and remember us when you make your fortune.

Sincerely,

Henry Wilbur
Director

Mountain Lake Biological Station
Research Experience for Undergraduates Program
Final Project Presentations

Thursday, August 8, 1996
2:10 - 5:30 p.m.
Auditorium

2:10 Introduction

2:15 **Miriam Heuhsen:** The Effect of an Invasive Ladybug Species on a Native Ladybug Species.

2:30 **Jessica Nehrling:** The Effects of Nutrient Additions on Soil Chemistry.

2:45 **Mare Brock:** The Effects of Sex Ratio Variation on Gynodioecious *Silene vulgaris*.

3:00 **Amy Barber:** Interactions Between a Native and an Introduced Salamander.

3:15 Break

3:30 **Sadie Jernigan:** The Effect of Floral Display Size on Male Fitness in *Silene virginica*.

3:45 **Heather Kieweg:** The Effect of Nutrient Addition on the Photosynthetic and Dark Respiration Rates of *Aster acuminatus* and *Rubus hispida*.

4:00 **Peter McIntyre:** Effects of Predatory *Pseudorhynchos* Larvae on Growth, Survival and Cover Object Usage in Larval *Desmognathus fuscus*.

4:15 **Jennifer Johnson:** Size-Structured Interactions: Evidence for Competition Between *Plethodon cinereus* and *Plethodon glutinosus*.

4:30 Break

4:45 **Eric Levy:** The Effect of Three Years of Nitrogen Addition on Root Biomass.

5:00 **Joel Kniskern:** Fitness Differences Among Local Populations of *Silene alba*.

5:15 **Priya Shahani:** The Effect of Cannibalistic Behavior on the Ability of Ladybird Beetles to Serve as Biocontrol Agents.
